SUMMARY

Computer Science undergraduate with a strong foundation in Data Structures & Algorithms, Object-Oriented Programming, DBMS and software engineering. Experienced in building scalable, end-to-end software and AI/ML solutions using C++, Python, SQL, Streamlit and Scikit-learn. Strong problem-solving and collaborative engineering skills with a customer-first mindset, hands-on experience in applied research through a DRDO internship. Passionate about building reliable, intelligent and user-focused software solutions that create measurable impact.

EDUCATION

- **Mody University of Science and Technology** 2024 – 2028
B.Tech in Computer Science & Engineering – CGPA: 9.47/10
Core CS Subjects: Data Structures & Algorithms, DBMS, Object-Oriented Programming.
- **Government H. Sec. School, Talwada Bujurg, M.P.** 2023 – 2024
Intermediate (Class XII) – 92.8%
- **Government H. Sec. School, Talwada Bujurg, M.P.** 2021 – 2022
Matriculation (Class X) – 90.0%

EXPERIENCE

Summer Intern June 2026 – July 2026

Defence Research and Development Organisation (DRDO), Jodhpur

- **AI-Based Patch Antenna Design**
Developed an AI-driven inverse design system for rectangular microstrip patch antennas using XGBoost to predict optimal antenna dimensions from the desired operating frequency. Built the **Patch Antenna AI** application featuring automated dimension prediction and interactive 3D visualization.
- **Vivaldi Antenna Design and Fabrication:** Designed, simulated and fabricated a Vivaldi antenna using CST Studio Suite. Evaluated antenna performance through return loss (S11), radiation pattern, gain and bandwidth analysis for wideband applications.
- **Technologies:** Python, XGBoost, Scikit-learn, Pandas, NumPy, Plotly, Streamlit, CST Studio Suite

PROJECTS

1. **ML Arena** June 2026
 - Developed an end-to-end machine learning platform supporting dataset upload, preprocessing, model training, evaluation and prediction across **8 ML algorithms**.
 - Validated the platform using **4 representative datasets** and integrated interactive visualizations, model comparison, performance evaluation and best-model recommendation.
 - **Technologies:** Python, Streamlit, Scikit-learn, Pandas, NumPy
2. **Food Order Management System** Feb 2026
 - Developed a desktop-based food ordering application using **Java Swing** with user and admin functionalities for registration, authentication, menu management and order processing.
 - Implemented **MySQL database integration using JDBC** and applied the **DAO pattern** for managing persistent user, menu and order data.
 - **Technologies:** Java, Java Swing, MySQL, JDBC, OOP, DAO
3. **AI Resume Analyzer & Career Assistant** Dec 2025
 - Developed an AI-powered web application to analyze resumes by extracting skills, calculating ATS scores and generating personalized feedback for resume improvement.
 - Designed a clean, user-friendly interface using HTML, CSS and JavaScript to simplify resume upload and feedback viewing for end users.
 - Implemented ATS scoring, intelligent job role recommendation, resume feedback generation and skill-based interview question generation using NLP and rule-based algorithms.
 - **Technologies:** Python, Flask, HTML, CSS, JavaScript, PyPDF2, NLP

TECHNICAL SKILLS

- **Languages:** C++, Java (Core), Python, SQL
- **Databases:** MySQL, Oracle Database, MongoDB
- **Web Technologies:** HTML, CSS
- **AI/ML:** Regression, Classification, XGBoost, Model Evaluation, Scikit-learn, Pandas, NumPy
- **Visualization & App Development:** Streamlit, Plotly, Matplotlib
- **Developer Tools:** Git, GitHub, Jupyter Notebook, Anaconda, NetBeans, Google Colab, LaTeX, XAMPP
