SUMMARY

Computer Science undergraduate with hands-on experience in Artificial Intelligence, Machine Learning, Full-Stack Development, and applied research through a DRDO internship. Passionate about building intelligent software solutions and applying AI to solve real-world engineering problems.

EDUCATION

- **Mody University of Science and Technology** 2024 – 2028
B.Tech in Computer Science & Engineering – CGPA: 9.47/10
- **Government H. Sec. School, Talwada Bujurg, M.P.** 2023 – 2024
Intermediate (Class XII) – 92.8%
- **Government H. Sec. School, Talwada Bujurg, M.P.** 2021 – 2022
Matriculation (Class X) – 90.0%

EXPERIENCE

Summer Intern June 2026 – July 2026

Defence Research and Development Organisation (DRDO), Jodhpur

- **AI-Based Patch Antenna Design:** Developed an AI-driven inverse design system for rectangular microstrip patch antennas using XGBoost Regression to predict optimal antenna dimensions from the desired operating frequency. Built the **Patch Antenna AI** application featuring automated dimension prediction and interactive 3D visualization.
- **Vivaldi Antenna Design and Fabrication:** Designed, simulated, and fabricated a Vivaldi antenna using CST Studio Suite. Evaluated antenna performance through return loss (S11), radiation pattern, gain, and bandwidth analysis for wideband applications.
- **Technologies:** Python, XGBoost, Scikit-learn, Pandas, NumPy, Plotly, Streamlit, CST Studio Suite

PROJECTS

1. ML Arena (June 2026) [GitHub Repository](#)

- Developed an end-to-end machine learning platform supporting dataset upload, preprocessing, model training, evaluation, and prediction.
- Integrated interactive visualizations, model comparison, performance evaluation, and export functionality using Streamlit and Scikit-learn.
- **Tech Stack:** Python, Streamlit, Scikit-learn, Pandas, NumPy

2. AI Medical Report Analyzer (Feb 2026) [GitHub Repository](#)

- Built an AI-powered web application for medical report analysis and patient health risk prediction using Random Forest.
- Implemented a Flask backend for report processing and real-time health risk prediction.
- **Tech Stack:** Python, Flask, Scikit-learn, HTML, CSS, JavaScript

3. AI Resume Analyzer & Career Assistant (Aug 2026) [GitHub Repository](#)

- Developed an AI-powered web application to analyze resumes by extracting skills, calculating ATS scores, and generating personalized feedback for resume improvement.
- Implemented ATS scoring, intelligent job role recommendation, resume feedback generation, and skill-based interview question generation using NLP and rule-based algorithms.
- **Tech Stack:** Python, Flask, HTML, CSS, JavaScript, PyPDF2, NLP

TECHNICAL SKILLS

- **Languages:** C++, Python, JavaScript, SQL
- **Web Technologies:** HTML, CSS, React.js, Flask
- **Machine Learning:** Regression, Classification, Model Evaluation, Scikit-learn, Pandas, NumPy, Streamlit, Plotly, Matplotlib
- **Database:** MySQL, Oracle Database
- **Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
- **Tools:** Git, GitHub, VS Code, Jupyter Notebook, Anaconda, LaTeX, XAMPP
